

To Whom It May Concern,

At Zoobies™, we are not taking the current safety concerns on foreign manufactured products lightly. All Zoobies™ products have been tested and successfully passed the SG1, ASTM, CE, and EN71 standards. Unlike most toy companies, we have our own office overseas that has been strategically put in place to manage quality control and to ensure that our products are safe and that they adhere strictly to all toy safety regulations. We wish to make it clear that **all Zoobies™ meet all necessary standards for safety** for all the countries we are distributing. In addition, we have gone above and beyond the required standards and do our own metal detector testing with each shipment, as well as use certified safety labs to specifically test our product for lead content on a regular basis.

We recognize that the burden is on us to make sure **our products are safe and trustworthy**. We will continue to work hard to **exceed the required standards** and ensure safety. Feel free to contact us with any questions or further information at [www.Zoobiepets.com](http://www.Zoobiepets.com).

Sincerely,

Ryan Trefl, JC Smoot, Travis Bush, Reid Smoot.
